# ○ CONSTRUCTIONS:

Using two circles, you construct equilateral triangles and perpendicular axes:

CONJUNCTION/OPP:  
SINGLE CIRCLE

**TRINE/SEXTILE: SECOND  
CIRCLE SHARED RADIUS**

CIRCLE FIRST

**SQUARE: TWO MORE CIRCLES  
NEW RADIUS = DIAMETER.**

# SQUARING THE CIRCLE

Many ancient mathematicians were fascinated by the relation of the circle to the square. They expressed this in mathematics as the problem of “squaring the circle”: which is, constructing a square with the same area as a given circle--gives rise to the idea of in co measurability: the inability of the finite to apprehend the Infinite  
Perhaps this problem represented a process of bringing the parts and corners of experience into a unified vision.

**Reality is *continuous with* its appearance**

**Real → *Power to re(ve)al and conceal* → appearance**

**Circle appears in and through and as square and reveals the square.**

**Square conceals and reveals circle—sunya.**

**Continuity = power of the Real as Creative Imagination and Order**
