

Unit of Life/Unit Soul meets World-idea

Anthony Damiani: Unit of Life 1:25

Each unit soul has an inviolable sanctity, in the sense that **it is an image of God**. But that it can be individuated and determined and fulfill a certain potential which is in the Mind of God, I think is a concept which is extraordinarily beautiful. . . . (1/6/84)

Taimni: The same kind of mathematical symbol and analysis will also throw some light on the problem of the co-existence of Oneness and Manyness in the Divine Consciousness.

IN AND OUT

We can symbolize **REALITY** as a point, everything is radiating from it. This point is merely the point-er to the Void.

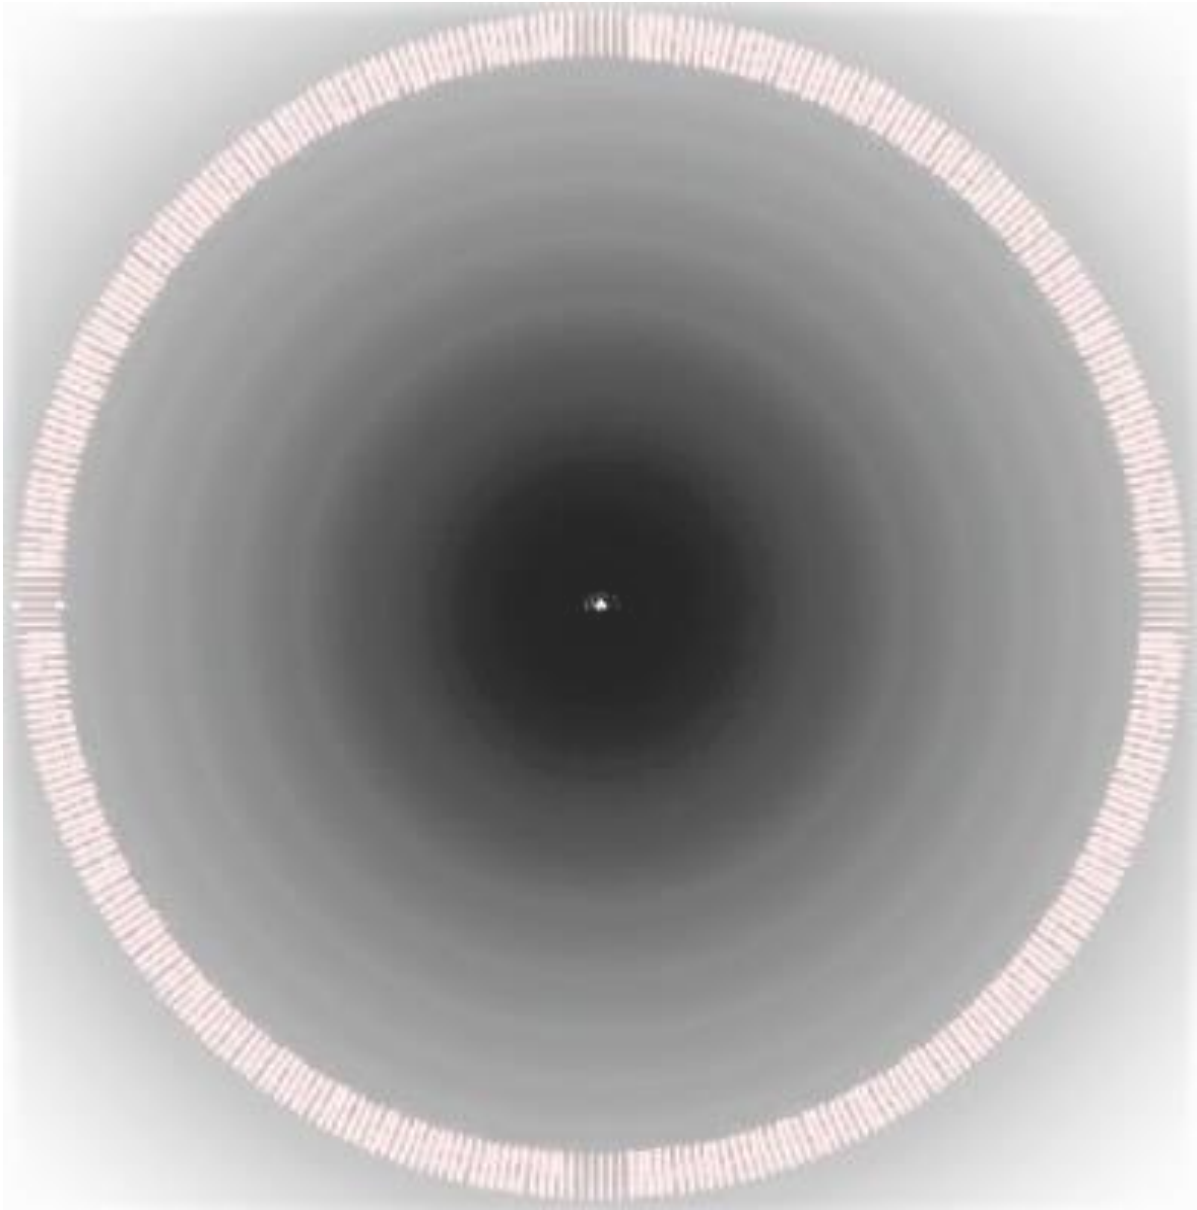

IN AND OUT

We can symbolize **REALITY** as infinite space, and everything is a contraction from the infinite: an infinitesimalization.

We need to use both.
